<b>1. What are you enjoying the most about the Virtual Stock Market Game?</b>	I enjoy learning to closely track the stock market and actively trading stocks for virtual profit.
<b>2. Please list 2-3 key strategies used in the game, and how you anticipate applying them to real life experiences in the future.</b>	<p>1. My first key strategy is to ensure that I invest all of my virtual money when buying or selling stocks. In order to maximize the return available in the market, I think it is important to invest all of the virtual money. I was able to discover many lessons with to the trial and error process without having the risk of losing actual money. This will benefit me in the future as I am learning the correct techniques that I will utilize to successfully invest in stocks in the future.</p> <p>2. My second key strategy is to invest in stocks that are highly likely to increase or decrease. When a company is mentioned as a takeover target. it may see major swings in its price. Sometimes, buying these stocks can be risky but taking risks are important in life. As I continue to take risks and learn from my mistakes and accomplishments, it will develop my mind to learn and predict when the right time to make such investments in the future is. Many situations will arise where I will need to make important and risky decisions; learning from this experience will aid in that decision-making.</p>
<b>3. Is there any feature of the game that you find confusing? If so, please provide specific examples.</b>	No, once I understood all the stock market terms and how they operated, I had little difficulty in operating the game.
<b>4. What is the most valuable thing you learned (knowledge or skills)?</b>	The most valuable lesson I learnt was the volatility of the market. The stock market is definitely dangerous and has its risks of landing you in a recession. My key skill is

usually to buy low and sell high. Sometimes, I obtain losses whereas other times I experience gains therefore, the trading process is a learning curve and is always susceptible to change. The investments can be insane but also incredibly exciting

**5. Overall, how can we improve this training?**

I think that the tutorial video could have been more descriptive. I know that for me, prior to this, I had absolutely no knowledge or exposure of how the stock market worked. I had to do a lot of additional research to understand how to navigate my way through the game.

**6. Testimonial**

This was my first experience participating in a stock market competition and I must admit, I am extremely happy that I was given the opportunity to participate. I will forever be grateful for the experience and knowledge that I have attained thus far.

**Parent: 1 minute video testimonial about the game and impact it has on your child**

WizdomCRM Family would like to thank you
