

Stock Market Game Prize & Testimonials

Name	Kimberly Roopnarine
Age	17
Type your school name	Iere High School
Choose date to collect Gift Voucher at Your School	Friday, Nov 19, 2021 3:00 PM - 4:00 PM
1. What are you enjoying the most about the Virtual Stock Market Game?	I am enjoying the excitement of learning new things. When I first started the game I did not understand alot about the stock market but after I started participating I started learning alot about the stock market and I am enjoying that the most. Also I enjoy the excitement of purchasing new stocks.
2. Please list 2-3 key strategies used in the game, and how you anticipate applying them to real life experiences in the future.	<p>Throughout the game I have learnt many things that can help me with my real life experiences in the future which are:</p> <ul style="list-style-type: none"> -Take opportunities for profitable stocks as they arise as they can quickly change. This has taught me that when you get an opportunity in life to take it and make the best of it as that opportunity can change very quickly. -Analyse stocks and look for possible trends. This has taught me to analyse situations that we face in life as it can help me make more effective decisions. -Use your information to your advantage. Analyse other available information like other's trading history so you can have an idea as to what stocks were profitable and what were unprofitable and even learn a useful technique. This can help me in the future as I have learnt that I should learn from others as there is always something you can learn from someone else, even if you may see these people as your competitors.
3. Is there any feature of the game that you find confusing? If so, please provide specific examples.	In the beginning of the game I found that it was very difficult to understand and interpret the graphs. However, throughout the game, I was able to learn how to use the graph and how to interpret it.
4. What is the most valuable thing you learned (knowledge or skills)?	Some of the valuable things I learnt are listed in 2. above.

However, the most valuable thing I learnt was that there is always something new to be learnt and to always be open to new experiences. At the beginning of the game I had very little knowledge on the stock market and participating in the game was very frightening. However, with time and effort, I was able to expand my knowledge on the stock market by learning from my mistakes and also by learning from the other fellow participants. So the most valuable thing learnt would be to always be open to new things whether it be knowledge or skills.

5. Overall, how can we improve this training?

Throughout the game I have not faced many difficulties or problems so I cannot pinpoint a specific area that the training needs improvement. However, I do think it would prove effective and easier for the players if the game had an app. This is because sometimes logging onto the website especially if you are very active in the training, can sometimes be troublesome and tedious.

6. Testimonial

The Virtual Stock Market Game was a major opportunity for me as I was interested in the Stock Market but I had no credible source of knowledge that made it easy for me to learn about the stock market. However when I started participating in the Virtual Stock Market Game it gave me the exposure and experience that I needed to learn about the stock market while learning other valuable lessons. The experience so far has been very exciting with the anticipation of making a profitable trade and even learning from my mistakes when I made an unprofitable trade. There were times when I would have made bad decisions on the game and I would feel like giving up but I have learnt to trust the process and to learn from my mistakes. The training truly is a very effective way of learning about the stock market as it has provided me with alot of new, exciting knowledge and I will continue to participate and learn more.

Parent: 1 minute video testimonial about the game and impact it has on your child

As parent of Kimberly Roopnarine I am giving my written testimonial as the video recording is difficult. The stock market game has been very helpful to her as she has been learning a lot. I cannot directly explain its impact but I can say that she has learnt a lot of new things and I am hoping she continues to do well. I do not know much about the stock market and I am glad that this opportunity for her to learn had arise and I have also learnt from her experience as she shares some of the things she learns with others. The game have provided this training which I hope she can use in the future and I know she has much more to learn.

WizdomCRM Family would like to thank you
