| 1. What are you enjoying the most about the Virtual Stock Market Game? | I enjoy the fact that I am able to represent my school while doing something that I love to do and while also being given the opportunity to learn and gain some experience with regards to the stock market. |
| 2. Please list 2-3 key strategies used in the game, and how you anticipate applying them to real life experiences in the future. | Two key strategies were: 1. Focus on investing your money on one stock instead of investing it on multiple stocks. 2. Use the financial statements of the companies to have a fair idea of their future performance. |
| 3. Is there any feature of the game that you find confusing? If so, please provide specific examples. | There is no feature of the game that I find confusing. |
| 4. What is the most valuable thing you learned (knowledge or skills)? | I learned that there was an option on the stock market to "sell" stocks where previous videos I had watched about the stock market never talked or mentioned about this option before. |
| 5. Overall, how can we improve this training? | News with regards to the happenings on the stock market can be made available and free to access for participants in this training where they can now be aware of these events and use this to guide their decision making with regards to what stocks to invest into. |
| 6. Testimonial | Before this stock market game, I was only doing research and watching videos on YouTube on how the stock market works. However, for me, I learn much better when I participate or actually do something than just reading up on it or watching videos about it. Hence, I was a bit frustrated |

that I was unable to find any means to take part in the stock market. However, I became excited when the school sent me an email about this stock market competition. This was exactly the type of opportunity I was looking for and for me, the price did not matter because I know by investing money into this, I was getting a lot of knowledge, experience and skills in return while in school that will prove to be beneficial for my long-term future. So far, I must say, I experienced way more than I ever thought I could and also learnt new strategies for the stock market and information that was never mentioned from videos or articles about the stock market.

Parent: 1 minute video testimonial about the game and impact it has on your child

WizdomCRM Family would like to thank you
