1. What are you enjoying the most about the Virtual Stock Market Game?	I enjoy the competitiveness of the game and how everyone keeps challenging each other for the top spots.
2. Please list 2-3 key strategies used in the game, and how you anticipate applying them to real life experiences in the future.	<p>Two key strategies that I used in the game include:</p> <ol style="list-style-type: none"> 1. Using other websites to check the premarket and regular market to find the most active stocks, The top gainers, and top losers. 2. Using candles to get a better view of the price action on yahoo finance. 3. Also the use of indicators especially vwap indicator.
3. Is there any feature of the game that you find confusing? If so, please provide specific examples.	I don't find any features of the game confusing.
4. What is the most valuable thing you learned (knowledge or skills)?	The most valuable thing I have learned is how the stocks move and the amount of profit you can generate from trading on the stock market.
5. Overall, how can we improve this training?	I can see this training improve by making the stocks on the in-game market update more frequently, as they only update once every minute or so, which can cause some trouble while buying and selling stocks.
6. Testimonial	I really enjoyed the game so far and my experiences with it were way different from what I expected it to be. I think the game is a really good way to learn about the stock market and help the youth understand the different stocks and the different things that can happen on the stock market. I

loved the amount of effort that went into preparing everything for the game and of course, I like the prizes that are being offered for the top students in the game.

Parent: 1 minute video testimonial about the game and impact it has on your child

WizdomCRM Family would like to thank you
