1. What are you enjoying the most about the Virtual Stock Market Game?	i enjoy the competitive feel of the game, knowing that a large mistake or a good decision can change the entire Leader board.
2. Please list 2-3 key strategies used in the game, and how you anticipate applying them to real life experiences in the future.	reading or listening to current news/updates about companies can help to give you insights on whether or not it is a good idea to invest in a company's stock/asset. Looking at graphs for past patterns can also help in finding opportunities to invest.
3. Is there any feature of the game that you find confusing? If so, please provide specific examples.	n/a
4. What is the most valuable thing you learned (knowledge or skills)?	i was able to put into practice things i had only studied in theory.
5. Overall, how can we improve this training?	in my opinion, there are a few kinks to work out in the system, but the live graphs should be first on the list, it barely (if ever) updates, making it hard for the players to determine opportunities to put in or take out trades.
6. Testimonial	The Widom CRM virtual stock machine game has allowed me to put to the test things i had only read and watched videos about. i thoroughly enjoy the competitive feel of the game and hope that many other students push forward and play more.
